DOCTOR BILL

+

HOSPITAL BILL

The physician's bill for medical care will be sent by The New York Eye and Ear Infirmary Ophthalmology Associates, P.C.

The hospital's bill is for nursing care, technical personnel, equipment, and supplies.

The total cost for many medical services is comprised of two fees: The hospital fee (technical component) and the physician fee (professional component). Each fee is billed separately by the provider of the services. Insurance generally covers both bills. If you have any questions, regarding the physician's fee, please call (800) 275-2688.
