

Stateside surgery

If a shopping trip to New York is on the wish-list for Christmas, it's good to know that some of the world's finest certified cosmetic surgeons are to be found there too – Professor Donald Wood-Smith explains why it pays to cross the Atlantic for cosmetic treatments...

Introducing The International Institute for Cosmetic Surgery at The New York Eye and Ear Infirmary, established 1820. State-of-the-art surroundings and surgery in New York City's finest specialty hospital.

Renowned as the first specialty hospital in America, The New York Eye and Ear Infirmary features an outstanding team of board certified plastic surgeons who specialise in all aspects of cosmetic surgery, including minimally invasive facelifts, upper and lower eyelid surgery, browlifts, nasal plastic surgery, and laser resurfacing. As leaders in their fields of expertise, the surgeons are consistently chosen to be among America's Top Doctors.

With the favourable exchange rate for the US Dollar, having cosmetic procedures performed in New York has become much more financially attractive. As an added convenience, UK patients may arrange a consultation appointment in New York with Professor Wood-Smith, or at the Harley Street Clinic of Professor John Celin. Follow up care is carried out in London, thereby minimising patients' travel time. Most patients choose to stay at the nearby W Hotel, and can usually return to the UK within two weeks or less.

The person behind the professional

Professor Donald Wood-Smith

WHAT IS YOUR PHILOSOPHY ABOUT COSMETIC SURGERY?

The best cosmetic surgery should be practically invisible, without the telltale signs of surgery. Through modern techniques, we can deliver a pleasing outcome with minimally invasive surgery.

WHAT IS YOUR FAVOURITE OPERATION? I enjoy secondary rhinoplasty procedures. These operations are difficult, but the outcome is rewarding for the surgeon and the patient.

HOW DO YOU SEE COSMETIC SURGERY EVOLVING IN THE FUTURE? There is no doubt that all patients today are seeking less invasive procedures that yield long lasting and natural results.

The New York Eye and Ear Infirmary was ranked among 'America's Best Hospitals 2008'
